PROFESSIONAL SUMMARY

Highly motivated and skilled **three stack software engineer** with expertise in developing robust and scalable web applications. Proficient in utilizing a wide range of technologies to bring to life visions and ideas. A quick learner and effective problem-solver, dedicated to continuous learning and staying up-to-date with industry trends and organization's needs.

SKILLS

- Programming Languages: **Java, JavaScript, Python**
- Front End: **HTML, CSS, Bootstrap**
- Databases: **MongoDB, MySQL**
- Frameworks/Libraries: **Express.js, Node.js, React.js, Flask, Spring Boot**
- Version Control: **Git**
- Tools: **VSCode**

PROFESSIONAL EXPERIENCE

E-COMMERCE PROJECT ENGINEER

- Developed E-commerce store using MERN (MongoDB, Express.js, React.js, Node.js) stack.
- Users can register and create accounts, enabling them to post items for sale along with accompanying pictures.
- Search, filter, watchlist and cart function fully functional.
- Sophisticated inbox system allows users to message each other and negotiate transactions.

ONLINE DATING PROJECT ENGINEER

- Developed online dating app using Python, Flask, and MySQL where users can register, browse, and upload photos along with personal preferences.
- Users can send "hearts" and will receive "match" status if action is reciprocated, this will then allow them to message one another.
- "Wall writing" feature implemented to encourage activities and spotlight users to main stage.
- Users can report and block inappropriate members. After three blocks, said member's account will be permanently suspended.

JIUJITSU TOURNAMENT PROJECT ENGINEER

- Developed application using Java, Spring, and MySQL that allows users to register and post Jiujitsu tournaments.
- Many-to-many relationships implemented as each user is saved to the database as creator and may also sign up for other tournaments.
- Users can message each other in private.
- Fully functional profile editing where users can update belt ranks and change names or passwords.

EDUCATION

Coding Dojo, Los Angeles, CA
Bootcamp Graduate, 3-Stack Software Development, 05/2023
